

CHRISTOPHER FELIX

Full Stack Developer | React.js | Angular | TypeScript | JavaScript | Node.js | NestJS | MongoDB | REST APIs | GraphQL

Trichy, Tamil Nadu, India | +91 8668105304 | christpherit@gmail.com | linkedin.com/in/christopher-felix-396a7125b | github.com/christpherit | christopherfelix-portfolio.netlify.app

PROFESSIONAL SUMMARY

Full Stack Developer with **2.8 years** of experience building production web applications with balanced, hands-on expertise across **React.js** and **Angular** ecosystems, backed by **Node.js**, **NestJS**, **Python**, **MongoDB**, **GraphQL**, and **REST APIs**. Experienced in designing reusable component systems, integrating frontend and backend APIs, and implementing **RBAC** and **JWT**-based authentication and authorization. Comfortable working across the complete **SDLC** — requirement gathering, sprint-based Agile/Scrum development, testing, and deployment — using **Jira** and **Docker** within collaborative, cross-functional teams. Familiar with modern AI-assisted development workflows, using tools such as **Claude Code**, **GitHub Copilot**, and **ChatGPT** to accelerate development and improve code quality.

TECHNICAL SKILLS

Frontend: React.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Shadcn/ui, Responsive Web Design, Component-Based Architecture, Reusable Components

Backend: Node.js, NestJS, Express.js, Python, REST APIs, GraphQL, Hasura, API Integration, API Development

Database: MongoDB, SQL, PostgreSQL

State Management & Data Fetching: TanStack Query, Server-State Management, Caching, Query Invalidation, API Synchronization

Authentication & Authorization: RBAC (Role-Based Access Control), JWT, Authentication, Authorization

DevOps & Deployment: Docker, Git, GitHub, Netlify, Render, Environment Configuration

Methodologies & Tools: Agile, Scrum, Sprint Planning, Jira, Jira Dashboard, Backlog Management, SDLC, Requirement Gathering, Requirement Analysis

AI Developer Tools: Claude Code, OpenAI Codex, GitHub Copilot, ChatGPT, Antigravity, Prompt Engineering, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Full Stack Developer — Nandalala Infotech, Trichy

Mar 2024 – Present

Delivered full-stack features across four internal client products spanning SaaS, CRM, security, and internal tooling, working sprint-by-sprint in an Agile/Scrum team using Jira for backlog and task management, across the complete SDLC — from requirement analysis through development, testing, and deployment.

Dentalsuite360 — Multi-Tenant Clinical SaaS Platform | Angular, Node.js, NestJS, GraphQL, Hasura, MongoDB, Docker

- Contributed across the full SDLC — requirement analysis, sprint planning, development, testing, and deployment — for a multi-tenant clinical SaaS platform.
- Engineered responsive Angular components and NestJS backend services powering core platform workflows.
- Designed and integrated **GraphQL** APIs via **Hasura**, enabling real-time data sync between UI and backend.
- Built a reusable component library that cut new-feature development time by **30%**.
- Implemented **RBAC** to manage permissions across Professional, Practice, and Supplier roles.
- Used **Docker** to containerize and standardize local development environments across the team.

SKAD (Arches CRM) | React.js, TypeScript, Shadcn/ui, TanStack Query

- Built dynamic CRM modules in **React.js** and TypeScript, using **Shadcn/ui** for consistent, reusable component design.
- Integrated **TanStack Query** for server-state management, API data fetching, caching, and query invalidation, reducing redundant network calls.
- Shipped a shared component set that improved UI consistency and cut future rework across the application.
- Collaborated with backend and design teams to translate stakeholder requirements into working interfaces through iterative sprints.

System Two Security | React.js, RBAC, JWT

- Built a secure user-management module with role-based UI states, **RBAC**, and **JWT**-based authentication and authorization.
- Developed a real-time chat interface and supported a customer support portal, improving internal response time.

Lala Invoice — Invoice Management System | React.js, Python, MongoDB, SQL

- Delivered a full-stack invoicing application end-to-end: React.js frontend, Python backend services, and MongoDB storage.
- Implemented **CRUD operations in Python** for invoice creation, retrieval, updates, and deletion, alongside SQL-based validation.
- Applied **RBAC** to separate Admin and User permissions across approval and reporting workflows.
- Built reporting features and input validation, improving data accuracy across the workflow.

Associate Java Developer — QR Solutions (Contract)

Mar 2023 – Jun 2023

Angular UI development for ModernStar.com (Australia-based client)

- Worked within a **Jira**-driven Agile/Scrum environment, participating in sprint planning, backlog grooming, and task tracking for a distributed client team.
- Built and shipped **Angular** UI components for ModernStar.com based on assigned Jira tickets, including banner and content updates.

- Delivered UI fixes and enhancements through iterative sprints, collaborating with a distributed team to meet requirement-driven deliverables.

PROJECTS

Personal Portfolio — *christopherfelix-portfolio.netlify.app* | *React.js, Node.js*

- Built a personal portfolio with reusable React components and a Node.js backend for API integration.
- Delivered a fully responsive, performance-optimized UI, deployed live on Netlify.

Mack Digital Services (Ongoing) | *Angular*

- Building an ongoing Angular frontend application with reusable components and a scalable, modular folder structure.
- Implementing responsive UI, client-side routing, and multiple service pages; collaborating via Git-based workflows.
- Structuring the application architecture in preparation for backend API integration.

EDUCATION

B.E. Mechanical Engineering — K. Ramakrishnan College of Engineering (2015 – 2019)

Higher Secondary School — AKKV Aarunadu Matric Higher Sec School (2013 – 2015)

LANGUAGES

English (Fluent) • Tamil (Native)
